

## Scientific Symposium

- Didactic + Q&A session
- 90 minutes long
- 3-4 speakers
- 15-20 mins per speaker
- 2-4 Chairs
- Goal is to engage in high-level scientific discussion on selected topics

## Post Graduate Courses

- Didactic or skills-based
- Pre-conference half- or full-day courses held on the Friday or Saturday
- Comprehensive, organized review of knowledge, rather than of recent advances only
- Incorporate active learning techniques (such as ARS), panel discussions, small group discussions, and breakout sessions

## Meet the Experts

- One hour session
- Presentations may take place at the beginning of the session and should not run longer than 20-30 minutes. The remainder of the hour should be left for discussion
- Combines programming formerly offered by sunrise seminars and meet the professor
- Presented by peer-recognized experts or emerging independent academics, researchers, clinicians, and technology or procedural experts

## Tips for Success

- Choose topics of broad interest to ATS members
- Program a diverse panel of speakers and chairs (consider diversity of sex/gender, geography, institution, career stage)
- Collaborate with members of other Assemblies to submit jointly-sponsored symposia.
- Make sure to select **CP Assembly** when submitting your proposal!
